## MOUNT GAMBIER VISITOR CENTRE

Mount Gambier Visitor Centre provides visitors with the opportunity to peer back in time at the pre-European history of the region. The centre is open daily except for Christmas Day.

## THE BLUE LAKE

Situated in one of three dormant volcanic craters, the Blue Lake exposes the crystal clear water that has filtered underground through the limestone, passing slowly beneath the city. Tours down into the crater of the Blue Lake, located on Bay Road, operate from the Reception Centre. Experience this fascinating 45-minute tour which takes visitors in a glass-panelled lift down the original dolomite well shaft, from where water was originally extracted. Walk through a tunnel to see the Blue Lake at close proximity and learn all about its history. The 3.6km road and walking track around the circumference of the lake provides access to many viewing points. The underpass between the Blue Lake and the Leg of Mutton Lake Crater offers great views of both areas.

## VALLEY LAKE & CENTENARY TOWER

Valley Lake, located on Davison Drive, is very popular all year round with excellent playground and recreational areas, and a wildlife conservation park. With well kept picnic areas, 16 free gas barbecues, covered shelters and large grassed areas, it can cater for many families. Admission is free.

From the car park, walk to Centenary Tower standing at 190 metres above sea level for spectacular views of the lakes, the city and the beautiful countryside. The foundation stone for the tower was laid on December 3rd, 1900, to commemorate the 100 years since Mount Gambier was sighted and named by Lt. James Grant aboard 'The Lady Nelson'. Located on Elliot Drive, a small fee provides entry to the tower which includes an extensive display of early photographs of the Crater Lakes area, souvenirs and refreshments. This attraction is open when the flag is flying.

# KANAWINKA

**LOCATED ON THE PLAINS OF SOUTH AUSTRALIA'S SOUTH EAST LIMESTONE COAST AND VICTORIA'S WESTERN DISTRICT, KANAWINKA GEOTRAIL IS AUSTRALIA'S MOST EXTENSIVE VOLCANIC PROVINCE.**

Recognised as being one of the most significant and third largest volcanic provinces in the world, this geotrail encompasses more than 56 sites.

Within the lava areas are four main precincts all with varying landscapes according to the period and type of eruption, including Australia's youngest volcanoes, highly accessible volcanic cave systems, off-shore volcanic islands, remains of coastal volcanoes and extensive systems of craters, lakes and wetlands.

Volcanic activity occurred in the Mount Gambier area in recent geological time and has been recorded as an important part of local Aboriginal culture. The outbursts, which would have been spectacular, took place during two different eruptive phases along the edge of a main zone of activity centred on southern and western Victoria.

Mount Gambier and Mount Schank, the more recent eruptions, are two of the better preserved examples of their type in Australia and are well known scenic attractions. Less well known is the extent of volcanic activity in the Mount Burr complex which contains 15 eruptive centres dated as occurring from 10,000 to 2 million years ago. Lakes Leake and Edward are water bodies present within volcanic craters, relying on rainfall to recharge them each year. The area is popular with naturalists, geologists, tourists and locals as the volcanic features are easily accessible via the walking trails provided.
